SUMMER 2027 SOFTWARE ENGINEERING & AI INTERNSHIPS / BOSTON · NYC · WORCESTER · AMHERST / F-1, CPT-ELIGIBLE

Computer Science undergraduate at UMass Amherst building LLM agent tooling in Python on the Claude Agent SDK and Model Context Protocol. Work centers on measurement: evaluation harnesses, failure-mode classification, and where published benchmarks stop predicting behavior on real inputs. Selected for two competitive programs, in applied AI and international exchange.

EDUCATION

University of Massachusetts Amherst

SEP 2026 – MAY 2030 · AMHERST, MA

B.S. Computer Science · Business minor (planned)

- Planned coursework: data structures & algorithms, artificial intelligence, machine learning, cloud computing, distributed systems, with a business minor for product and commercial reasoning.

TECHNICAL SKILLS

LANGUAGES	Python, Java
AI & AGENTS	LLM agents, Claude Agent SDK, Model Context Protocol (MCP), Claude Code, machine learning, evaluation design
CLOUD	Cloud computing fundamentals, AWS fundamentals
SECURITY	Network & cloud security, ethical hacking, Kali Linux
TOOLS	Git, GitHub, Linux / CLI, HTML & CSS
SPOKEN	English, Telugu, Hindi, German (conversational)

PROJECTS

CALIGO — Autonomous Personal Assistant Agent

IN ACTIVE DEVELOPMENT

Cognitive Architecture for Logic, Inference & Generative Optimization

PYTHON · CLAUDE AGENT SDK · MCP

- Building an LLM agent that decomposes multi-step tasks and executes them through tool calling, persistent memory, and Model Context Protocol servers.
- Instrumenting where autonomy runs out — tracking which of context, tooling, or memory degrades first before a human has to step back in.
- Writing an evaluation harness that measures task completion across repeated runs and classifies failure modes rather than logging pass/fail.

Citation Hallucination in LLM Output — Survey Paper

DRAFTING · 2026

First preprint targeted for arXiv

LLM EVALUATION · ARXIV

- Surveying published methods for detecting fabricated citations in LLM output, and why benchmark performance fails to transfer to real documents.
- Comparing evaluation methodologies to locate where current benchmarks under-test real-world failure.

EXPERIENCE

AI & Python Intern

JUN – JUL 2025 · HYBRID

IIT Jammu Executive Programs

- Earned selection for a competitive pre-university research internship in applied AI, mentored directly by IIT Jammu faculty.
- Developed and evaluated machine learning models on real-world datasets, owning the loop from data cleaning and feature preparation through training and error analysis.
- Applied algorithm design and exploratory data analysis to open problems, defending results in faculty review sessions.

Selected Delegate, PASCH Exchange

JUN – JUL 2023 · BREMEN, GERMANY

Goethe-Institut e.V.

- Won a fully funded place on a month-long international language and culture immersion program in Germany.
- Reached conversational German through intensive training, collaborating on team projects with delegates from several countries.

CERTIFICATIONS & TRAINING

- Google Cybersecurity Professional Certificate — Google · Coursera
- Programming with Python & Exposure to A.I. — IIT Jammu Executive Programs
- Cybersecurity & Ethical Hacking Workshop — Aylence · IIIT Hyderabad
- Anthropic Academy — 9 courses — Claude Code in Action, Model Context Protocol, Agent Skills, AI Fluency series
