SUMMER 2027 SOFTWARE ENGINEERING & AI INTERNSHIPS / BOSTON · NYC · WORCESTER · AMHERST / F-1, CPT-ELIGIBLE

Incoming Computer Science undergraduate at UMass Amherst, starting September 2026. Builds LLM agents in Python on the Claude Agent SDK and Model Context Protocol, and is learning to evaluate them properly. Selected for two competitive programs in applied AI and international exchange.

EDUCATION

University of Massachusetts Amherst
B.S. Computer Science · Business minor (planned)

- **Chancellor’s Award** — \$72,000 merit scholarship over four years.
- Fall 2026 coursework: InfoCompSc 110 Foundations of Programming · Mathematic 131 Calculus I · Physics 151 General Physics I · FYS 191MCS26 Topics in CICS · PublicHlth 160 My Body, My Health.

SEP 2026 – MAY 2030 · AMHERST, MA

TECHNICAL SKILLS

LANGUAGES	Python, Java
AI & AGENTS	LLM agents, Claude Agent SDK, Model Context Protocol (MCP), Claude Code, machine learning, evaluation design
CLOUD	Cloud computing fundamentals, AWS fundamentals
SECURITY	Network & cloud security, ethical hacking, Kali Linux
TOOLS	Git, GitHub, Linux / CLI, HTML & CSS
SPOKEN	English, Telugu, Hindi, German (A2 certified), Japanese (learning)

PROJECTS

CALIGO — Autonomous Personal Assistant Agent
Cognitive Architecture for Logic, Inference & Generative Optimization

- Building an LLM agent that decomposes multi-step tasks and executes them through tool calling, persistent memory, and Model Context Protocol servers.
- Instrumenting where autonomy runs out — tracking which of context, tooling, or memory degrades first before a human has to step back in.
- Writing an evaluation harness that measures task completion across repeated runs and classifies failure modes rather than logging pass/fail.

IN ACTIVE DEVELOPMENT
PYTHON · CLAUDE AGENT SDK · MCP

Citation Hallucination in LLM Output — Survey Paper
First preprint targeted for arXiv

- Surveying published methods for detecting fabricated citations in LLM output, and why benchmark performance fails to transfer to real documents.
- Comparing evaluation methodologies to locate where current benchmarks under-test real-world failure.

DRAFTING · 2026
LLM EVALUATION · ARXIV

EXPERIENCE

AI & Python Intern
IIT Jammu Executive Programs

- Earned selection for a competitive pre-university research internship in applied AI, mentored directly by IIT Jammu faculty.
- Developed and evaluated machine learning models on real-world datasets, owning the loop from data cleaning and feature preparation through training and error analysis.
- Applied algorithm design and exploratory data analysis to open problems, defending results in faculty review sessions.

JUN – JUL 2025 · HYBRID

Selected Delegate, PASCH Exchange
Goethe-Institut e.V. · PASCH Initiative

- Won a fully funded place on a month-long international language and culture immersion program in Germany.
- Reached A2 certified German through intensive training, collaborating on team projects with delegates from several countries.

JUN – JUL 2023 · BREMEN, GERMANY

CERTIFICATIONS & TRAINING

- Google Cybersecurity Professional Certificate — Google · Coursera
- Programming with Python & Exposure to A.I. — IIT Jammu Executive Programs
- Cybersecurity & Ethical Hacking Workshop — Aylence · IIIT Hyderabad
- German A2 Certification — Goethe-Institut
- Anthropic Academy — 9 courses — Claude Code in Action, Model Context Protocol, Agent Skills, AI Fluency series
- **In progress:** [GitHub Foundations \(GH-900\)](#) · [AWS Certified Cloud Practitioner \(CLF-C02\)](#)
